carrier debonair 220 thermostat instruction manual

Follow all local electrical codes during installation. All wiring must conform to local and national electrical codes. Improper wiring or installation may damage thermostat. Recognize safety information. This is the safety alert symbol. When the safety alert symbol is present on equipment or in the instruction manual, be alert to the potential for personal injury. These words are used with the safety alert symbol. DANGER identifies the most serious hazards which will result in severe personal injury or death. WARNING signifies a hazard which could result in personal injury or death. CAUTION is used to identify unsafe practices which would result in minor personal injury or property damage. GENERAL The commercial, 7day, programmable thermostats are wallmounted, lowvoltage thermostats which maintain room temperature by controlling the operation of an HVAC Heating, Ventilation, and Air Conditioning system. Separate heating and cooling set points and autochangeover capability allow 4 different programming time periods for energy savings. Each thermostat stores programs for 7 independent days. Batteries are not required. During power interruption the internal NEVERLOST memory stores programmed schedules for an unlimited amount of time while the clock continues to run for at least 48 hours. The thermostat can be configured to accept several different equipment configurations, including heat pump operation. NOTE The thermostat is not factoryconfigured for use in heat pump applications. The 33CS220FS thermostats do not have these connections. PACKAGE CONTENTS ITEM QUANTITY Thermostat 1 Cutout Template 1 1in. Post the model of the furnace. The backlight of the LCD screen does not work. Neither do the buttons
for the thermostat glow red or blue respectively. What could be causing this problem I know that is
simple but it doesnt hurt to ask. Do you have the 24 volts needed to operate the tstat. If you have 18
volts that may affect the lights. Use with most. Control bottoms doesnt work have to depress really
hard and eventually works If so replace them. If its an older model used frequently oil from your
hands gets behind the buttons which causes intermittent connections and can cause display error.
Remove the unit, carefully open it up and clean all contact surfaces with qtip and a bit of rubbing
alcohol. May solve your problem. While your at it make sure all wire connections are tight. Mark all
